MATERIAL AND TECHNICAL REQUIREMENTS

Space requirements

- An open-plan space to accommodate the installation and all the equipment. **Two separate spaces** are required:
 - o VR area and 2D video projection space:
 - Square layout: 10m x 10m or
 - Rectangular layout: 12m x 6m
 - o Live performance area: 5m x 5m (minimum dimensions)
- Dance floor (linoleum), wooden floor, or a dark-coloured floor.

Our installation proposal is adaptable to the dimensions of the space, as it is designed with individual panels so that it can be installed partially or completely.

Stage / Furniture

Stage_ON provides:

- 2 curved panels 180cm x 230cm (45° arc)
- 2 straight panels 120cm x 230cm
- 1 straight panel 240cm x 230cm
- Material for fastening the panels
- Duct tape, masking tape and reflective tape
- 1 inflatable PVC plastic bubble of 2.20m in diameter (live performance)
- Electric fan (to inflate the bubble for the live performance)

Equipment of the venue:

- 2 tables for equipment and material (Meta Quest devices, batteries and computer)
- Chairs for staff, users and the audience (minimum 15)
- 1 dressing room

Sound

Stage_ON provides:

- Computer with music for the performance to be launched from the device.

Equipment of the venue:

- Suitable audio equipment for the 2D video projection area
- Suitable audio equipment for the live performance area
- Minijack cable to connect our computer to the sound desk.

Lighting

Equipment of the venue:

- Colour-changing LED spotlights (4 to 6 units)
- Sockets and enough electrical power to connect 32 devices
- 6 power strips (4 plugs each minimum) y 6 extension cords.

Audiovisual

Stage_ON provides:

- Meta Quest devices (number to be agreed upon with the organization)
- External batteries, headphones and charges for the VR glasses.
- 2 Computers for video projections and Meta Quest app.
- 1 video projection screen (300cm x 230cm)
- 1 video projection screen (150cm x 230cm)
- 1 Viewsonic short-throw video projector

Equipment of the venue:

- 1 TV monitor with an HDMI input
- 1 or 2 video projectors (if there is a TV monitor, only 1 video projector is required)
- 4 fibre-optic HDMI cables (3 cables, each at least 20 metres long, plus 1 cable at least 3 metres long)
